# FUTURE *retro*

The combination of past and future. The future is more tangible than ever. Technical and digital developments have made amazing progress. The yearning for old and trusted values, timeless classics, and particularly the warm nostalgia of the 50s and 60s is on the rise. Modern interpretations of natural textures such as marble, terrazzo and walnut, characterise the design of which past and future influences combine to create a stylish symbiosis.

Urban design charm. Living and office spaces are becoming more open, transitions more fluid. Small living spaces should not only be practical but designed in a minimalist way. Influenced by Scandinavian design, materials such as wood, stone and metal form the link with urban charm creating the style Light Urban.

# PURE

## *nature*

Back to nature: the more technology finds its way into our lives, the more we feel the desire for original materials. Oak continues to be a popular trend in woodgrain decors. Whether with natural grains or with authentic characteristics such as cracks and knots, it continues to prove its popularity in design and provides exciting contrasts when combined with complementing decors.

# PERFECT

*imperfection*

Perfection meets emotion. Perfection can be easily achieved with the help of the latest technology, but this is not always desirable in design. Irregularities and imperfections, such as cracks and weathered materials convey a natural appearance and invokes emotion. The heavy used look or industrial style in combination with very calm and straight-lined designs creates the style Perfect Imperfection.

## The passion for wood is in our nature.

A fascinating raw material: the respectful use of wood has always been at the heart of what we do, from efficient resource processing to the finished product. Since it was established in 1961 in Tirol, Austria, everything at EGGER has always been about wood. We source our wood from local and sustainable sources and utilise recycled materials whenever possible.

Our flooring is free from pollutants, plasticisers and PVC and our decors are printed using water-based dyes. Our efforts to minimise our environmental impact throughout the manufacturing of our flooring products has been recognised with numerous national and international environmental certifications. Our passion for wood is evident when you enter a room with an EGGER Floor.

**Comfort Flooring**  
Warm, soft, quiet.

**Laminate Flooring**  
Practical, durable value, easy-care.

## Which type of flooring is right for you?

Whether you will enjoy your flooring for a long time depends not only on its appearance. First, consider in which room the flooring is used and how. Our robust Design Flooring is the best choice for heavily used areas such as the kitchen and hallway. In the bedroom, the Comfort Flooring with sound and thermal insulation creates cosiness. Our Laminate Flooring gains points with its wide range of decor options for your individual living style. Its five different board formats provide the

perfect backdrop for a wide variety of room sizes. For bathroom and toilet, however, we recommend a moisture-resistant solution: our Aqua+ Laminate or the Design Flooring. And, last but not least, the budget determines whether you opt for beautiful, everyday flooring or for special properties. But so much is clear: with an EGGER Flooring you make the right choice.

# Floor board formats, colour tone, sorting.

## Or simply: Flooring with wow effect.

Even with simple means they add to your rooms that certain something. Select the flooring decor and design with its colour the mood in the room – from light and vivid to dark and cosy. The floor board format helps you to underline the impression the room makes: Emphasise generous space ratios with long, wide floor boards, small spaces appear

larger with short, narrow floor boards. And with the sorting – that is, the characteristic grain and texture of the decor – they calm or enliven the spatial image.
